“Company address”

Dear Recruiter:

I am submitting my candidature for a Full Stack Web Development at “Company Name”. My passion is to work with extremely talented people and collaborate to make products that would make an immediate impact. I enjoy web development and hack things up for learning new technology or projects I want to pursue.

Most of my learning comes from a project or a problem I want to solve, and it is by solving that problem I grow and develop my coding abilities. I always break down the problem into smaller pieces and work my way up using and learning the necessary tools to complete it. For example, by working on the HTTP client, I have learned how HTTP client works under the hood. I have excellent work ethics and I enjoy solving difficult challenges and learning from them. Web development is something I am passionate about, which reflects my decision for applying here.

I truly hope to make a solid contribution to a team at “Company Name”, and I look forward to speaking with you in person.

Sincerely,

Luben Frank Gonsalves
