

---

**PROJECTS**

---

<b>HTTP Client (Electron-based)</b>	<b>AttainU</b>	<b>May 2019</b>
-------------------------------------	----------------	-----------------

- [Repository](#)
- Built a cross-platform desktop application for interacting with HTTP based APIs with features to import and export collection of requests.
- Technologies used - React and Redux.

<b>SocioTube</b>	<b>AttainU</b>	<b>Jul 2019</b>
------------------	----------------	-----------------

- [SocioTube](#), [Repository](#)
- Built an application for people to understand social problems around them, with features like video upload and events upload.
- Used local storage of the browser and eliminated implementation of the backend.
- Technologies used - Node.js, Express, Handlebars, MongoDB.

- 
- MERN Stack - Javascript (ES5 & ES6), MongoDB, Express, React, NodeJS
  - Python, Postgresql, Heroku & AWS

---

**EDUCATION**

---

<b>Software Engineering</b>	<b>AttainU</b>	<b>Feb 2019 - Present</b>
-----------------------------	----------------	---------------------------

- Full-stack web development using MERN stack.
- Core software engineering, data structures and algorithms.

<b>Mangalore</b>	<b>Mangalore Institute of Technology &amp; Engineering</b>	<b>Aug 2014 - Jul 2018</b>
------------------	--	----------------------------

- B.E, Computer Science Engineering.
- Core software engineering, data structures and algorithms.
- Operating Systems, database systems and computer networks.

<b>Mangalore</b>	<b>St. Aloysius Pu College</b>	<b>Jun 2012 - Mar 2014</b>
------------------	--------------------------------	----------------------------

- Specialization on computer science-PCMC.

---

**POSITIONS OF LEADERSHIPS/EXTRACURRICULAR ACTIVITIES**

- 
- Served as a coordinator for TEDx event (TEDxMITE) held at Mangalore institute of technology and engineering in 2016.
  - Completed JavaScript Algorithms and Data Structures Certification (300 hours) on freeCodeCamp.org.
