PROJECTS

HTTP Client (Electron-based)   **AttainU**   **May 2019**

- Repository
- Built a cross-platform desktop application for interacting with HTTP based APIs with features to import and export collection of requests.
- Used local storage of the browser and eliminated implementation of the backend for storing data.
- Technologies used - React and Redux.

SocioTube   **AttainU**   **Jul 2019**

- SocioTube, Repository
- Built an application for people to understand social problems around them, with features like video upload and events upload.
- Technologies used - Node.js, Express, Handlebars, MongoDB.

- MERN Stack - Javascript (ES5 & ES6), MongoDB, Express, React, NodeJS
- Python, Postgresql, Heroku & AWS

EDUCATION

Software Engineering   **AttainU**   **Feb 2019 - Present**

- Full-stack web development using MERN stack.
- Core software engineering, data structures and algorithms.

Mangalore   **Mangalore Institute of Technology & Engineering**   **Aug 2014 - Jul 2018**

- B.E, Computer Science Engineering.
- Core software engineering, data structures and algorithms.
- Operating Systems, database systems and computer networks.

Mangalore   **St. Aloysius Pu College**   **Jun 2012 - Mar 2014**

- Specialization on computer science-PCMC.

POSITIONS OF LEADERSHIPS/EXTRACURRICULAR ACTIVITIES

- Served as a coordinator for TEDx event (TEDxMITE) held at Mangalore institute of technology and engineering in 2016.
- Completed JavaScript Algorithms and Data Structures Certification (300 hours) on freeCodeCamp.org.
